easyredmine

Price comparison

Pay less for your Jira.
Replace it with Easy Redmine.

Pay less for your Jira.
Replace it with Easy Redmine.

Easy Redmine is a powerful project management tool that offers a wider range of features than Jira, which can be quite expensive for small and medium-sized teams. In this file, we will compare the pricing of four products with the old prices of Jira Server, and the new prices of Jira Cloud and Jira Data Center in comparison with Easy Redmine Server solution.

Please **choose the number** of users and features you are looking for from the following list below.

1. Price comparision Easy Redmine **vs.** Jira Software Data Center, Jira Software Cloud and Jira Software Server

| 150 users | 350 users | 550 users | 750 users |

2. Price comparision Easy Redmine + Knowledge base 2.0 + GitLab **vs.** Jira Software + Confluence + BitBucket

| 150 users | 350 users | 550 users | 750 users |

The tables below represent the comparison of four Jira products with Easy Redmine solution.

1. Price comparision Easy Redmine **vs.** Jira Software Data Center, Jira Software Cloud and Jira Software Server

150 users	Easy Redmine	Jira Software Data Center	Jira Sofware Cloud	Jira Software Server
Price for **1** year	16.065 €	42.000 €	14.500 €	26.400 €
Price for **3** years	28.134 €	126.000 €	43.500 €	52.800 €
Price for **5** years	36.180 €	210.000 €	72.500 €	79.200 €

350 users	Easy Redmine	Jira Software Data Center	Jira Sofware Cloud	Jira Software Server
Price for **1** year	33.320 €	42.000 €	26.000 €	40.000 €
Price for **3** years	58.352 €	126.000 €	78.000 €	80.000 €
Price for **5** years	75.040 €	210.000 €	130.000 €	120.000 €

550 users	Easy Redmine	Jira Software Data Center	Jira Sofware Cloud	Jira Software Server
Price for **1** year	49.088 €	72.000 €	37.000 €	60.000 €
Price for **3** years	85.965 €	216.000 €	111.000 €	120.000 €
Price for **5** years	110.550 €	360.000 €	185.000 €	180.000 €

750 users	Easy Redmine	Jira Software Data Center	Jira Sofware Cloud	Jira Software Server
Price for **1** year	66.938 €	72.000 €	48.000 €	60.000 €
Price for **3** years	117.225 €	216.000 €	144.000 €	120.000 €
Price for **5** years	150.750 €	360.000 €	240.000 €	180.000 €

2. **Price comparision** Easy Redmine (Knowledge base 2.0 + GitLab) **vs.** Jira Software (Confluence + BitBucket)

150 users	Jira Software Confluence + BitBucket	Easy Redmine Knowledge base 2.0 + GitLab	Your savings
Price for **1** year	84.200 €	31.860 €	62,16%
Price for **3** years	252.600 €	55.775 €	77,92%
Price for **5** years	421.000 €	71.719 €	82,69%

350 users	Jira Software Confluence + BitBucket	Easy Redmine Knowledge base 2.0 + GitLab	Your savings
Price for **1** year	84.200 €	66.080 €	20,13%
Price for **3** years	252.600 €	115.682 €	77,67%
Price for **5** years	421.000 €	148.700 €	82,86%

550 users	Jira Software Confluence + BitBucket	Easy Redmine Knowledge base 2.0 + GitLab	Your savings
Price for **1** year	150.400 €	97.350 €	35,27%
Price for **3** years	451.200 €	170.424 €	62,23%
Price for **5** years	752.000 €	219.141 €	70,86%

750 users	Jira Software Confluence + BitBucket	Easy Redmine Knowledge base 2.0 + GitLab	Your savings
Price for **1** year	150.400 €	132.750 €	11,74%
Price for **3** years	451.200 €	232.397 €	48,49%
Price for **5** years	752.000 €	298.828 €	60,26%

Conclusion 1

Atlassian's pricing policy is disadvantageous for most companies.

As we can see, the pricing policy of Atlassian, represented by **Jira Software (cloud) and Jira Data Center**, appears to be **disadvantageous** for most companies when **compared to Easy Redmine**. With initial costs that thanks to Atlassian's tiering policy are usually bigger than Easy Redmine and TCO which increase significantly over time, Jira Software (cloud) and Jira Data Center are more expensive options.

Meanwhile, **Easy Redmine maintains its cost-effectiveness** with a much lower TCO even after several years. Based on these findings, it can be concluded that Atlassian's pricing policy is not the most favorable option for companies, making Easy Redmine a more budget-friendly choice. Why? Because when using Easy Redmine **you pay for the exact number of users**. This is especially visible for smaller and mid-sized teams.

Conclusion 2

Atlassian's on-premises solution (Data Center) is extremely expensive.

The difference is even more apparent when we look at Jira Data Center. As we wrote before, Atlassian forces Jira users to accept Atlassian's preferred licensing models with its extensive tiering policy. If you have less than 500 users, you will be paying the fixed price for the tier.

On the other hand, **Easy Redmine offers a payment model per user increment**. This can make a huge difference for smaller teams. Considering Easy Redmine offers **more features** and advanced project management tools in a single stack, it makes it a viable option for everyone looking to reduce their tooling costs.

NOTE The prices of Jira Software listed above may not be accurate, this study was based on the following resources:
Jira Server prices were taken from Jira's partner (Akeles, 2019)
Jira Cloud prices were taken from (Atlassian, 2023)
Jira DataCenter prices were taken from (Atlassian, 2023)
