

# How Easy Software simplified 53 manual processes in 6 months with AI-powered automations

## BEFORE IMPLEMENTATION

Easy Software faced internal operational inefficiencies across all departments:

- Identified 53 manual, repetitive processes consuming 18% of total workforce capacity
- Time wasted on administrative tasks across teams
- Disconnected processes between Sales, Marketing & Development
- Waste in quality and reduced value in deliveries causing overhead expenses

 **24** Weeks to deployment — 
  **400+** Workflows created — 
  **11** Workshops & hackathons — 
  **0** Business disruption

## AFTER IMPLEMENTATION

Easy8.ai made complete transformation with specialized AI agents and n8n workflow automations:

- Alfred (Sales AI Agent) - automated lead processing & proposals
- Trinity (Controlling AI Agent) - real-time financial dashboards
- JARVIS (Personal AI Agent) - individual productivity assistant for calendar, Outlook emails and tasks
- Native Easy Redmine integration automations with custom triggers & buttons

"This internal transformation proved that we practice what we preach. By eliminating 53 processes and saving 30 man-days weekly, we've not only improved our efficiency but also gained invaluable insights that directly benefit our clients. Our team now focuses on innovation rather than administration."

Daniel Zach, COO of Easy Software
